Election/Restrictions

Applicant's election of Group 1 in the reply filed on 05/08/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

Claims 17-20, 42-47 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 17-20 are confusing because applicant failed to further limit or recite the seat as set forth in one of claims 1-16. Accordingly, the scope of claims 17-20 cannot be determined.

Claim 42 further limit the seat mounted on a platform of "the amusement apparatus" which renders claims 42-47 because the amusement apparatus is merely an intended use of the seat as set forth in claim 21. However, the limitation above positively recites the connection between the seat and it intended use. Therefore, it was not clear whether the amusement apparatus is part of the claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 13, 14, 15, 16, 21-31, 34, 38, 48, 49, 50, 56, 57 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 2004/073818 (WO'818).

WO'818 disclosed a seat for an amusement apparatus, the seat comprising a support (12), means for immobilizing (24) for leaving the passenger's shoulders free and immobilizing him through an abdominal or thoracic portion and the support is shaped to receive the passenger astride the seat as shown in Figs. 5A and 5B. The immobilizing means includes at least one frontal support (32) or (13) with respect to a user and opposing means (24) designed to act on the user's back. The opposing means can move between an open position and a closed position (Figs. 1A, 1C) and the opposing means includes an arm (24) suitable for rotating with respect to the support. Figs. 1A-1C show the arm can be adjusted in various positions. Casing (32) is considered as partially covering the frame as shown in Figs. 2 and 3.

Allowable Subject Matter

Claims 7-12, 32, 33, 35-37, 39-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
